

# mohdfayed / django-job-board

---

 [github.com/mohdfayed/django-job-board](https://github.com/mohdfayed/django-job-board)

mohdfayed

## Quick setup — if you've done this kind of thing before

---

 Set up in Desktop  
**or**

Get started by creating a new file or uploading an existing file. We recommend every repository include a README, LICENSE, and .gitignore.

## ...or create a new repository on the command line

---

```
echo "# django-job-board" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/mohdfayed/django-job-board.git
git push -u origin main
```

## ...or push an existing repository from the command line

---

```
git remote add origin https://github.com/mohdfayed/django-job-board.git
git branch -M main
git push -u origin main
```

## ...or import code from another repository

---

You can initialize this repository with code from a Subversion, Mercurial, or TFS project.

### Import code

 **ProTip!** Use the URL for this page when adding GitHub as a remote.
